FullStack Web Developer

Web Developer specializing in Front End and Back End development, with solid experience in creating clear and secure code. I excel in integrating web technologies and designing attractive interfaces, ensuring that web applications meet industry standards and client needs. I have experience in developing, testing, and deploying robust and scalable applications, always considering accessibility to ensure my applications meet the standards. I enjoy learning what I don't know and staying updated on new technologies.

Technological Tools: Angular , TypeScript , JavaScript , Nest , RxJs , GIT , GITHUB , Prisma, Node , Java , HTML , CSS , PostgreSQL , MYSQL , MongoDB , JEST , Karma , Jasmine , WEB SOAP , REST API , JPA , EJB , JSF , J2EE , Spring , MVC , SOLID , AGILE, JIRA, Trello , Cypress, Postman, ARIA label, LitElement, PrimeNg, AngularMaterial, apexcharts.

Languages: Spanish, English, Italian

PROFESSIONAL EXPERIENCE

Full Stack Web Developer Freelance   *10/2024 - actualmente*
CRM for Lama Canyon   Remoto - *Aprilia, Italia*

I developed the frontend using **Angular 18**, utilizing external libraries such as **Angular Material**, **ApexCharts**, and **JWT**, among others. I developed the backend with **Node (Express).** The database is in **MySQL** on **AWS RDS**. The platform tracks money inflows and outflows, estimates gross and net profits, and manages clients, orders, inventory items, and suppliers.

Front End Angular Developer   *11/2024 - 12/2024*
Voltix - Igrowker   Remoto - *Madrid, España*

I developed the front end of a platform for Eficae Iotech, using **Angular 18** with **Tailwind CSS, JWT, ApexCharts, Docker, GitFlow,** and Python on the backend with a **PostgreSQL** database. On this occasion**, I led the frontend team**, which consisted of six people. We worked remotely using the **Scrum methodology**.

FullStack Web Developer Freelance   *11/2023 - 09/2024*

Moto Market   *Madrid, España*

I developed a complete application for a third party using the **NestJS** framework for the backend, implementing the database with **PostgreSQL** and **Prisma** as the ORM. I created an easy-to-use front-end design with **HTML, CSS, JavaScript, TypeScript**, and the latest version of **Angular**. I conducted **unit, integration, and end-to-end (E2E) testing**. I used modern development tools such as **Git** and GitHub to collaborate on the code and manage version control.

Full Stack Developer   *01/2020 - 09/2023*

NAF SERVIZI   Remoto - *Pomezia, Italia*

Responsible for creating functional and intuitive applications and websites for clients using WordPress, **HTML, CSS, JavaScript, TypeScript,** and **Angular** on the front end. On the back end, I have worked with **NodeJS** and **Java**, handling **REST APIs** and **GraphQL**, among others. All developed applications are supported by testing. I also maintain and update existing web applications to ensure security and performance.

Achievements

- **Winner of the 2024 AdoptaUnJunior Hackathon:** Participated and won the October 2024 AdoptaUnJunior Hackathon with the CMR Impact Social Cup project. I worked in a team of five people, and we developed a CRM from scratch with the frontend in React and the backend in NestJS. I was personally in charge of developing the backend.

Education

- FP2 in Chemistry and Biology | IPSIA E. CAVAZZA, Rome, Italy | 2006

- **FullStack Web Developer | ISDI CODERS, Madrid, Spain | 2024**

- **Java EE Course | Core Network, Madrid, Spain | 2024**

- **Oracle Java EE 7 Application Developer Certification (1Z0-900) | Oracle | 2024**
