RESUMEN

Web developer with front and back end training.
My skills include: my ability to create clear and secure code, skills for integrating web technologies and designing attractive interfaces.
Expert in developing, testing and deploying web applications that meet customer needs and industry standards.

WORK EXPERIENCE

Project MotoMarket
Fullstack developer
2023 - Now

I developed an application entirely using the NestJS back framework, implementing the database with PostgreSQL and Prisma as ORM.
Implementation of an easy-to-use front design with HTML, CSS, Javascript, Typescript and using the latest version of Angular.
Testing of unit, integration and E2E tests.
Using modern development tools like git and gitHub to collaborate on code and create version control.
